PEAKPOINT

Custom SOFTWARE AND CONSULTING SOLUTIONS

WHAT IS IN IT FOR MY ORGANIZATION?

Do you want to spend less time on recruiting and training software professionals?

Does your organization require the flexibility to adjust its staff size to meet its objectives in software design, development, installation and support?

Could your organization benefit from skilled, experienced and motivated professionals ready to take on challenging assignments and bring them to a successful conclusion?

Do you want to minimize employee turnover, avoid layoffs and reduce the costs associated with providing your professional staff with a competitive benefits package?

Are you looking for a company to share in development costs on specific products?

ANSWER

PeakPoint can assist you in THREE ways:
- Custom software solutions (project based pricing)
- Strategic partnerships and alliances (royalty based development)
- Professional services (hourly contractors)

WHO WE ARE

PeakPoint Technologies Inc. was founded with the mission of providing quality software solutions to government and private organizations at a reasonable cost and on time. Our objective is to assist organizations in reaching their goals through the seamless integration of highly skilled professionals and cutting edge technology. We want to deliver the best value for the customer's money. PeakPoint has an extensive track record of delivering services to both industry and government since 1997. PeakPoint supported systems and databases have been deployed all over the United States and several countries.

CUSTOM SOFTWARE SOLUTIONS

PeakPoint specializes in the design, development, implementation and support of custom software. Our services can be valuable for any business which requires development
in areas such as GUI, client-server, database and internet/ e-commerce.

PeakPoint will:
- Develop custom software at customer facilities, at our own facility or off-shore
- Meet customer requirements and specifications at a fixed price
- Deliver, install and support software
- Travel domestically or internationally for short-term or extended on-site assignments

Advantage:
- Requires short lead time
- Provides needed professional skills and expertise
- Insures meeting deadlines
- Reduces need to train employees for short-term projects

SHARED DEVELOPMENT

PeakPoint will invest its own money to develop its products and services for targeted markets. Peak-Point may help your organization by sharing in development costs on specific products and services. Compensation typically comes from a royalty scheme based upon the sales of the products or services developed by PeakPoint.

PeakPoint can provide:
- Strategic Alliances
- Custom Software Development
- Off-shore development at cost savings of 20%-40%

FOCUS AREAS

Our professionals have both broad and in-depth experience in desktop, embedded/realtime, mobile, client-server, cloud, e-commerce and internet application development, database development/administration and quality assurance using the following products and technologies with an active commitment to keep up with changing technologies.

- Platforms: Windows, Unix variants, iOS (Apple), Android, Embedded/Realtime
- Languages: C#, .net, Java, J2EE, Python, PERL
- Databases: Oracle, Sybase, SQL Server, ETL, Cognos, SSIS
- Internet: XML, HTML, SOAP

COMMITMENT TO QUALITY SERVICE ON TIME AND AT REASONABLE COST

PeakPoint is committed to quality. Our success is driven by asking the right questions, listening to the answers and responding with a suitable solution for your organization. You can rely on the use of our skilled professionals when you need to accelerate projects or lack people who have the professional skills to fulfill them.
